## Discovery Deliverable

10:00:00	Industry Expert	So tell me what you like about using Take 1?
10:00:01	Production Manager	I really like the fast turnaround. I can upload rushes to them in the morning, and have my transcripts back that afternoon - absolutely ideal if we're running into an edit.

10:00:05	Industry Expert	<b>GRAPHICS ON SCREEN:</b> WORKING WITH TAKE 1
10:00:09	Production Manager	You bet. With so many timecodes per page, I can locate my sound bites quickly and have a rough edit together in no time at all, which is great for the budget.
10:00:13	Industry Expert	What formats do Take 1 accept?
10:00:18	Production Manager	They accept loads of formats. I love it. I can send them DVD with BITC, timecoded mp3 files, Quicktime and they're even developing a solution to work directly from P2 and XDCam proxy files. They're really good at keeping up with technology.
10:00:22	Industry Expert	Just the sort of supplier you want! They sound like they know what they're talking about...
10:00:29	Production Manager	Absolutely... <COUGH> Their staff are really technical and friendly. I know I can trust them to get the job done. And they talk my language.
10:00:34	Industry Expert	Do you ever worry you will overload them with a big job?
10:00:48	Production Manager	No, not at all. They have so many typists in their pool, their capacity is huge. They've never let me down on a deadline, and sometimes I have put them under serious pressure. <PHONE RINGING> Like that time I sent them 30 hours of interviews on a 24hr turnaround...
